

## Special Issue

# Electrospinning for Tissue Engineering, 2nd Edition

### Message from the Guest Editors

This *Bioengineering* Special Issue on “Electrospinning for Tissue Engineering” aims to promote the positive achievements and potential of this field of science and technology by gathering contributions from worldwide experts on electrospinning and fiber engineering, pharmaceutical and therapeutic material development, and the scale-up and manufacturing of nanofiber-based medical materials. You are welcome to find publications from the first edition of this Special Issue at the following link:

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
