

Special Issue

Advanced Bioremediation Technologies and Processes—2nd Edition

Message from the Guest Editors

Bioremediation is one of the most appealing approaches for the sustainable restoration of environmental matrices contaminated by organic or inorganic compounds. Various strategies, including natural attenuation, biostimulation, and bioaugmentation, can be applied to face the restoration of contaminated sites. The Second Edition of this Special Issue will focus on original research papers and comprehensive reviews dealing with innovative bioprocesses and technologies for sustainable, effective, and multidisciplinary restoration of contaminated sites. Topics of interest include, but are not limited to, the following:

Development of innovative bioremediation technologies for the restoration of contaminated environmental matrices;

Novel bioprocesses for remediation;

Advances in the characterization and monitoring of contaminated sites;

Advanced omics for bioremediation;

Circular economy in remediation technologies;

Bio-based materials from waste valorization processes for remediation technologies.

Machine learning approaches and artificial intelligence for remediation.

Guest Editors

Dr. Bruna Matturro

Water Research Institute (IRSA), National Research Council (CNR),
00010 Montelibretti, Italy

Dr. Laura Lorini

Department of Chemistry, Sapienza University of Rome, Piazzale Aldo
Moro 5, 00185 Rome, Italy

Deadline for manuscript submissions

closed (31 July 2025)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
