

## Special Issue

# Sports Biomechanics and Wearable Technology

### Message from the Guest Editors

Research on human sports performance is moving from the laboratory to the field of play, partially due to the growing adoption of wearable sensor technologies. At the same time, there have been concerns from athletes, coaches, and sports scientists about the output from wearables related to the contextual relevance of the data, as well as inconsistencies and inaccuracies. The opportunity to capture game and practice sports performance data is a driving force behind quantifying personal success, mitigating injuries, and establishing expert performance models. The combination of wearable sensor signals, machine learning, and biomechanics assists researchers in helping coaches and athletes gain valuable insight into their training, performance, and recovery. This Special Issue will focus on recent research and developments in the science and engineering of developing, implementing, and adopting wearable sensor technology for use in sports.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
