

## Special Issue

# Operational Medicine Applications of Bioengineering

### Message from the Guest Editors

Operational medicine refers collectively to the delivery of healthcare under a wide range of challenging conditions including austere environments, conflict or war zones, climate change-forced migrations, extreme weather conditions such as arctic freeze and oppressive heat waves, and natural disasters such as hurricanes and earthquakes. Operational medicine is a concern for military medicine, rural medicine, disaster medicine, or any field which includes the delivery of health care under potentially extreme conditions with limited resources. Advances in bioengineering promise to solve the various issues encountered in operational medicine, enabling the proper monitoring of human health, the detection of environmental exposures, providing novel therapies, or even preventing injury. This Special Issue invites papers that show advances in bioengineering that can benefit operational medicine by improving the prevention, delivery, detection, and/or treatment of injuries common to austere conditions. Dr. Vincent B. Ho

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
