

Special Issue

Advanced Optical Tools for Biomedical Applications

Message from the Guest Editor

Disease, cancer, COVID-19, etc., are major threats to human society and the healthcare system. To maintain the quality of human life and the stability of the healthcare system, scientists are paying a lot of attention to research techniques and tools for early cancer detection or disease treatment. Besides traditional methods such as Polymerase chain reaction (PCR), recent, optical methods such as optical fiber systems, optical imaging, optical spectroscopy, optical coherence tomography, polarization, etc., have attracted the attention of many research groups due to their reliability and effectiveness. Considering the latest achievements in advanced sensing technologies, monitoring systems, computational modeling methodologies, etc., this Special Issue aims to attract original research papers focusing on recent advances in optical sensing, monitoring systems, and computational modeling methodologies for advanced optical tools for biomedical applications.

Guest Editor

Dr. Quoc-Hung Phan

Department of Mechanical Engineering, National United University,
Miaoli, Taiwan

Deadline for manuscript submissions

31 July 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
