Artificial Intelligence in Biomedical Imaging

Message from the Guest Editors

We are pleased to present a new Special Issue on “Artificial Intelligence in Biomedical Imaging”. This Special Issue aims to highlight recent developments in AI-driven biomedical imaging technologies, such as novel machine learning models, image analysis algorithms, imaging devices/sequences, optimization, effectiveness predictions, interpretability, translatability, etc. We are looking for articles on AI-driven biomedical imaging that can support better medical diagnostics/treatment for individual patients in healthcare systems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) / CiteScore - Q2 (Bioengineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2026).
