

Special Issue

Advanced Restorative Dental Materials and Implant Technologies

Message from the Guest Editors

Advancements in dental materials and technologies have revolutionized modern dentistry, providing improved solutions for complex dental conditions such as dental caries, periodontal diseases, and tooth loss. These innovations feature advanced materials and state-of-the-art techniques that enhance durability, biocompatibility, and aesthetics, along with custom-made implant technologies designed to ensure superior integration and long-term stability. This Special Issue aims to highlight the latest developments and applications of restorative dental materials and implant technologies in clinical and research contexts.

Researchers and practitioners from the fields of dental materials, restorative dentistry, prosthodontics, periodontics, and oral and orthognathic surgery are encouraged to contribute original research, clinical case studies, reviews, and meta-analyses that explore these advancements and their impact on improving patient care and oral health outcomes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
