

Special Issue

New Sights of Mathematical Modeling in Biomedicine: Updates and Direction

Message from the Guest Editor

In recent years, mathematical modeling and machine learning have spread to almost all fields. This Special Issue focuses on the latest advancements and future directions in mathematical modeling applied to the field of biomedicine. This issue brings together a collection of research papers and studies that highlight the emerging trends, innovative techniques, and novel applications of mathematical modeling in understanding and improving various aspects of biomedicine. It begins with an overview of the current state of mathematical modeling in biomedicine, discussing its strengths, limitations, and potential for future growth. Subsequent papers delve into specific areas of research, such as the modeling of gene regulatory networks, mathematical optimization for personalized cancer treatment, and the use of machine learning algorithms in predicting disease outcomes. Furthermore, this issue explores the integration of mathematical modeling with other scientific disciplines, such as genomics, proteomics, and systems biology, to create a comprehensive framework for understanding and studying biological systems.

Guest Editor

Dr. Kayode Oshinubi

School of Informatics, Computing, and Cyber Systems, Northern Arizona University, Flagstaff, AZ, USA

Deadline for manuscript submissions

31 January 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
