Special Issue

Advances in Intelligent Health Management and Rehabilitation Technology: Integrating Large Language Models and Al Solutions

Message from the Guest Editor

The emergence of intelligent health management and rehabilitation technologies represents a dynamic integration of artificial intelligence (AI), machine learning (ML), and contemporary healthcare practices. This interdisciplinary field aims to enhance traditional rehabilitation, enable precise health monitoring, and promote proactive management of chronic diseases. With the evolution of large language models (LLMs), such as GPT and similar foundational models, the potential for intelligent, personalized, and explainable health solutions is significantly expanded.

By integrating LLMs with existing intelligent health systems, this Special Issue aims to uncover the potential of explainable, adaptive, and interactive healthcare solutions. These technologies can empower patients and clinicians alike with real-time insights, efficient workflows, and personalized care.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
