

Special Issue

Recent Advances in the Application of Mathematical and Computational Models in Biomedical Science and Engineering (2nd Edition)

Message from the Guest Editors

Mathematical modeling in biomedical engineering plays a vital role in understanding complex multidisciplinary interactions and processes at the organ, tissue, and cellular scales. This Special Issue aims to collect papers related to the advancement and development of novel mathematical models broadly applied across a wide range of biomedical engineering and medical physics, including diagnostic, therapeutic, imaging, and interventional applications. Topics of particular interest include: Coupled multiphysics and multiscale models in bioengineering and biomedicine; Bioheat models and thermography; Models for cancer theranostics; Patient-specific models; Dynamic and network models; Machine learning and multiscale modeling in the biological, biomedical, and behavioral sciences; Synthetic biology and its applications; Mathematical approaches for regenerative medicine; Hemodynamics and drug delivery models; Computational neuroscience and neuroengineering, data-driven approaches in multidisciplinary neuroscience; Numerical methods and algorithms in the biomedical engineering; Computational and systems biology; Reduced-order models; Biomedical simulation and high-performance computing.

Guest Editors

Dr. Sundeep Singh

Prof. Dr. Roderick Melnik

Dr. Manpreet Singh

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
