

## Special Issue

# Explainable Artificial Intelligence (XAI) in Medical Imaging

### Message from the Guest Editors

Using artificial intelligence (AI) in medical imaging can transform diagnostics, prognosis, and clinical decision-making. However, its adoption is limited by a lack of transparency and interpretability. Explainable Artificial Intelligence (XAI) addresses this by providing insights into how AI systems make predictions, increasing clinician trust and enabling regulatory compliance.

Current XAI techniques—such as SHapley Additive exPlanations, LIME, and Grad-CAM—have shown promise across imaging modalities. However, significant gaps remain:

- Lack of standardized benchmarks for evaluating explanation quality
- Insufficient integration of clinical context in interpretability frameworks
- Limited understanding of how explanations influence clinical decision-making

This SI welcomes original research, reviews, and perspective articles on novel XAI methods applied to medical imaging. Topics of interest include:

- Applications of XAI to emerging clinical problems
- Critical analyses of current XAI pitfalls and limitations
- Development and validation of new XAI techniques
- Addressing ethical and regulatory standards for XAI clinical use

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
