

Special Issue

Optical Imaging for Biomedical Applications

Message from the Guest Editors

Optical imaging is a type of imaging technique that uses visible, ultraviolet, and infrared light to create images of soft tissue without using any harmful radiation. Unlike X-rays, which require ionizing radiation, optical imaging is a safe and non-invasive way to monitor disease progression and treatment efficacy. The Special Issue, entitled "Optical Imaging for Biomedical Applications," showcases recent advancements in developing, designing, modeling, implementing, and characterizing optical imaging techniques for biomedical applications. Special Issue covers, but is not limited to, the following topics:

Microscopy;
Digital pathology;
Infrared spectroscopy;
Raman spectroscopy;
NIR spectroscopy;
Hyperspectral imaging;
Combinations with MRI, X-ray, CT, or micro-CT;
Advanced imaging techniques and systems;
Imaging-guided surgery and treatment;
Artificial intelligence-based computational imaging techniques for biomedical imaging;
Image processing.

Guest Editors

Dr. Johannes Dominikus Pallua

Prof. Dr. Christian Huck

Prof. Dr. Jürgen Popp

Deadline for manuscript submissions

closed (20 April 2025)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
