

## Special Issue

# Application of Hyperspectral Imaging in Health and Disease

### Message from the Guest Editor

Hyperspectral imaging (HSI) is an emerging non-invasive imaging medical technique. HSI provides an evaluation of intrinsic biochemical tissue characteristics based on tissue–light interactions and enables novel diagnostic approaches in diverse medical disciplines. Research in the fields of wound care, surgery, and intensive care indicates the potential of HSI to answer so far unresolved questions in patient care. Despite this increasing interest, clinical trials to demonstrate improvements in patient outcome due to medical HSI applications are limited. However, ongoing advances in imaging technology and computer science could make HSI a future imaging modality for synergistic diagnostic and therapeutic improvements in perioperative as well as critical care medicine. This Special Issue aims to publish high-quality original research, including case reports, reviews, and short communications, concerning up-to-date medical applications of hyperspectral imaging. We welcome translational research to provide readers with information about current limitations and possible future directions in medical hyperspectral imaging.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
