Biomechanics of Sports Injuries

Message from the Guest Editors

Recently, as sports activities gradually increase and become part of life, the frequency of sports injuries gradually increases, and the interest in them is also increasing. Sports injuries can occur in any part of the body. Damage to the muscles of the body, as well as the shoulder, elbow, arm, hand, spine, hip, knee, foot, and ankle joints, may be present. These sports injuries can have a great economic impact as well as delayed return to daily life and sports activities if proper treatment and rehabilitation are not received for not only elite athletes but also ordinary people. In order to establish an appropriate treatment and rehabilitation process for sports injuries, it is essential to understand the biomechanics of sports injuries. Reviews of existing biomechanics as well as research related to new theories on the biomechanics of sports injury are actively welcomed. This Special Issue collects original research focused on new biomechanics or recapitulation of previously described biomechanics as useful tools for understanding sports injuries.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
