Machine-Learning-Driven Medical Image Analysis

Message from the Guest Editors

Recent advances in the fields of imaging facilities, biochemical assays, imaging analysis and machine learning algorithms have provided us with new opportunities to interrogate previously intractable diseases, including cancer. With artificial intelligence being widely applied to multi-modal medical images in recent years, it has greatly improved the objectivity and efficiency of repetitive tasks. However, the end goal of bringing AI into clinical settings is to provide reproducible and quantitative second opinions for clinicians and medical practitioners. In another words, predicting the prognosis in the early stage or suggesting the potential response of a targeted therapy would directly facilitate the personalization of the therapeutic regime for individual patients. In this regard, it is of great clinical significance to develop trustable AI tools for disease prognosis and treatment response based on various modalities of medical images. We, therefore, invite you to submit high-quality original research, including comprehensive reviews, on the topic of “Machine-learning-driven medical image analysis”.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
