## Orthodontic Biomechanics

### Message from the Guest Editor

Having a thorough understanding of orthodontic biomechanics is essential for designing a force system capable of treating malocclusion and supporting sound periodontal tissues. Even though modern orthodontics utilizes skeletal anchorage reinforcement, technically eliminating the reactive forces, considering how harmful they can be in cases where the absolute anchorage fails, one has to admit the importance of mechanics analysis prior to its application. This Special Issue on “Orthodontic Biomechanics”, therefore, will focus on original research papers, comprehensive reviews, and case reports dealing with the well-documented results of biomechanics used in the treatment of malocclusion.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
