

## Special Issue

# New Sight of Vascular Engineering and Biomaterials: Updates and Future Directions

### Message from the Guest Editors

Cardiovascular diseases (CVDs) have remained the greatest threat to health globally in the past decades. Current state-of-the-art studies have already demonstrated the high quality of work in understanding the relationships between vessel cells and extracellular matrix, designing anticoagulant, anti-inflammatory, and anti-infectious scaffolds, minimizing intimal hyperplasia, achieving completely off-the-shelf, advanced techniques in using various stem cells, in situ attracting desirable host cells for remodeling, fabrication of self-assembled tissue-engineered vascular grafts, bioprinting with high precision and accuracy, biomimetic design on different levels of the regenerated construct, novel biodegradable stents, etc. Thanks to these great efforts, we believe a Special Issue on vascular engineering and biomaterials is a great platform to share those brilliant and most up-to-date studies exploring the possibility of next-generation grafts, stents, and tissue substitutes with functional microvessels.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
