Biotechnological Advances in Industrial Enzymes and Green Bioprocessing

Message from the Guest Editors

The green bio-manufacturing industry, characterized by high efficiency, safety, energy-saving capability, and environmental-friendliness, is a global hot spot in industrial development with broad market prospects. Industrial enzymes represent the “chip” of green biological process. The exploitation, molecular modification, high-efficiency expression and application of new industrial enzymes constitute the enabling technologies of green bio-manufacturing. At present, along with the rapid development of the key techniques of synthetic biology such as genome editing and metabolic engineering, more and more industrial microorganisms are being designed and modified for green bio-manufacturing. This Special Issue of *Bioengineering*, entitled “Biotechnological advances in industrial enzymes and green bioprocessing”, addresses worldwide advances in biotechnology and bioengineering for promoting the rapid development of industrial enzymes and green bioprocessing in food industry, feed industry, agricultural field, pharmaceuticals industry, traditional light industries and other domains.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
