Computed Tomography Techniques and Applications

Message from the Guest Editors

Computed tomography (CT) is vital in clinical practice for cross-sectional imaging, generating large amounts of attenuation data rapidly. Radiologists use these data to distinguish pathologies from normal variations, often aided by simple quantitative measurements such as distances and attenuation values. Radiomics feature extractions, such as radio-genomics, radio-pathological correlations, and clinical outcome prediction, are rarely used due to various obstacles, including increased workload, software limitations, abstract interpretation, limited reproducibility, and insufficient evidence. However, scientific studies show promising results. This Special Issue focuses on high-quality contributions to enhance various aspects of CT data utilization, including input data improvement, image segmentation, data processing, feature extraction, workflow integration, knowledge dissemination, quality control, and clinical evaluation. We welcome technical investigations, experimental trials, and clinical assessments in this field.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
