

## Special Issue

# Bioengineering of the Motor System

### Message from the Guest Editor

The motor system involves a neural control system, a mechanical structure, an actuation system, and mechanisms of energy supply. Knowledge about their function has considerably progressed over the years, but many aspects are still worth investigating and offer new insights. A substantial contribution to the advancement of knowledge is provided by new technologies that offer the possibility of analysing biological phenomena in detail and designing clinical applications. Bioengineering has become central to building on our understanding of both normal and pathological human posture and movement. Bioengineering of the motor system therefore presents itself as a new discipline, where physiology, clinical experience, and technology are integrated into methods for measuring, visualizing, and interpreting the biological phenomena connected to motor function. This Special Issue aims at collecting experiences and demonstrations from this multidisciplinary approach. Contributions in the various areas of interest are expected to provide a picture of the state of the art of this discipline and to show its potential and perspective for future advancements.

### Guest Editor

Prof. Dr. Carlo Albino Frigo

Movement Biomechanics and Motor Control Lab, DEIB, Politecnico di Milano, Milan, Italy

### Deadline for manuscript submissions

closed (31 July 2024)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
