

## Special Issue

# Bioengineering Cardiovascular Cell and Gene Therapies: Advances and Translational Challenges

### Message from the Guest Editors

Cardiovascular diseases remain the leading cause of morbidity and mortality worldwide, driving the urgent need for innovative therapeutic strategies.

Bioengineering approaches, particularly in cell and gene therapy, hold great promise for advancing cardiovascular regeneration, repair, and disease treatment. Despite significant progress, the clinical translation of these therapies is hindered by challenges in the design of biomaterials, gene delivery, cell sourcing, scalability, and regulatory approval.

Addressing these hurdles requires an interdisciplinary effort that integrates bioengineering principles with cutting-edge biomedical research. This Special Issue invites researchers to submit original research articles and comprehensive reviews that explore novel bioengineering strategies to improve cardiovascular cell and gene therapies. Topics of interest include, but are not limited to, the following: Biomaterials and Scaffold; Gene Delivery Systems; Stem Cell and iPSC Technologies; Tissue Engineering and Organoid Model; Microfluidics and Organ-on-a-Chip Models; The Immunomodulation and Biocompatibility; Translational Barriers.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
