Special Issue

Al in MRI: Frontiers and Applications

Message from the Guest Editors

Recent advances in artificial intelligence (AI) have created tremendous opportunities for improving the capabilities of medical imaging. Magnetic resonance imaging (MRI), in particular, is a highly versatile modality that may greatly benefit from the incorporation of Al along different points of the imaging pipeline. Recent studies have demonstrated the potential use of AI for scan time reduction, improved disease classification/segmentation, extraction of quantitative parameters from low signal-to-noise-ratio images, and automatic protocol design. This Special Issue of Bioengineering, titled "AI in MRI: Frontiers and applications" will include new and exciting results from original research endeavors, reviews of the state of the art, and highlights of the upcoming challenges and opportunities in the field.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
