

Special Issue

Bio-Applications of Engineered *Escherichia coli*

Message from the Guest Editors

This Special Issue on “Bio-Applications of engineered *Escherichia coli*” will focus on original research papers, comprehensive reviews and communications on the use of engineered *E. coli* to solve several of mankind’s problems. We welcome engineered *E. coli* applications related to the production of value-added compounds that promote sustainable and economically viable industrial processes, the development of new diagnosis tools and treatments, and ways to fight global warming, among other topics. Areas of interest for this Special Issue include, but are not limited to, the following:

- *E. coli* as chassis for the expression of heterologous pathway for value-added compound production;
- *E. coli* as chassis for the production of therapeutic proteins and/or molecules;
- Development of improved *E. coli* strains to overcome limitations (e.g., post-translational modifications absence);
- Development of tools to improve *E. coli* engineering;
- *E. coli* as a whole-cell biosensor in diagnostic tools, pollution detection, etc.;
- Engineered *E. coli* as therapeutic agent.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) / CiteScore - Q2 (Bioengineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
