Applications of Cell and Tissue Mechanics in Cardiovascular Regenerative

Message from the Guest Editors

Despite several technological advances, the worldwide mortality and morbidity due to cardiovascular diseases continue to occur at a staggering rate. The last 10 years have seen a particular focus and emphasis on regenerative approaches towards restoring cardiovascular function. These include but are not limited to one or more of the following: exosomal biology, stem cells, mechanical conditioning, novel biomaterials, proteomics, and genomics. The field of regenerative medicine has the potential to facilitate a major breakthrough in the treatment of cardiovascular diseases. The intent of this Special Issue in the journal *Bioengineering*, entitled “Cell and Tissue Mechanics in Cardiovascular Regenerative Medicine”, is to encourage you and your team to contribute your recent findings on this topic. Kindly refer to the Keywords and Manuscript Submission Information below. I look forward to receiving your submission to this Special Issue of *Bioengineering*.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
