Drug Delivery Systems, What's New?

Message from the Guest Editor

Drug delivery is the method or process of administering a pharmaceutical compound in order to achieve therapeutic effects in humans or animals. Delivering drugs at targeted sites in a controlled release manner over time has become an attractive method in recent years. The tunable and responsive physicochemical properties of biomaterials are rendered to smart drug delivery systems. These drug carriers can be engineered to transport different types of cargos such as small molecules, proteins, and genetic materials, which enable their applications in the treatment of many diseases. This Special Issue will focus on the new aspects of the drug delivery systems. All original research and review articles related to this topic are welcomed.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
