

## Special Issue

# Advances in Ultra-compact Acoustics and Photoacoustics for Scientific and Clinical Innovation

### Message from the Guest Editor

For the last decades, biomedical acoustics and photoacoustics have thrived, with compelling and promising progress ranging extensively from basic research to clinical translation, based on their versatile imaging configuration and spatiotemporal resolution, and minimal or total non-invasiveness. In particular, their efficient implementation has been presented along with advances in electronic engineering and signal processing algorithms to enable ultracompact/wearable/implantable system configurations. This trend now opens new pathways toward novel scientific and clinical investigations, necessitating a continuous or point-of-care monitoring with morphologic/functional contrast in biological subjects. The aim of this Special Issue is to present the state-of-art progress on such advances in system developments and their scientific and clinical applications. Keywords:

- ultra-compact electronics
- biomedical imaging
- photoacoustic imaging
- ultrasound imaging
- preclinical and clinical validations
- signal processing

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
