

Special Issue

Antimicrobial Peptides for Therapeutic Applications

Message from the Guest Editor

This Special Issue of *Biologics* will cover new research in the area of antimicrobial peptides as biologics. The focus of this issue will be on the interactions of antimicrobial peptides with host cells and the mechanism of their multiple biological functions, as well as the methods for their characterization. Additionally, research on clinical and pre-clinical experiments involved in the application of antimicrobial peptides in human medicine and on animal models is warmly welcome. We particularly welcome original research papers and reviews on the potential use or clinical application of antimicrobial peptides in biomedical sciences. Manuscripts are due on 31 December 2022, but earlier submissions are welcome, and they will be processed upon receipt and published online upon acceptance.

Guest Editor

Dr. Joanna Wessely-Szponder

About the Journal

Message from the Editor-in-Chief

Biologics is an international, multidisciplinary, peer-reviewed, and scientific open access, open source journal that encourages authors to submit high-quality papers in all areas of biologics derived from both novel and established biotechnologies. We invite you to contribute original research articles, review articles, perspectives or case reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Gary McLean
