Deadline for manuscript
submissions:

closed (1 July 2025)

Message from the Guest Editor

Dear Colleagues,

The anthropogenic destruction of biodiversity has been ongoing for centuries or even millennia in many areas of the Old World, but it has never been more intense than it was in the past century. The development of increasingly energy-intensive human populations, the expansion of cultivated plants and domestic animals, the diffusion of alien and invasive species, and the impacts of technologies are accelerating transformative processes of natural ecosystems at an unprecedented and uncontrollable rate.

Research on conservation biology is at the heights of its activity, boosted by unprecedented possibilities of collecting and modelling big data in the ecology of ecosystems and populations, population genomics, as well as microevolution and co-adaptation processes between components of the biosphere and the technosphere.

Therefore, we invite anyone interested to contribute their papers to the realization of the special issue in 'Conservation Biology and Biodiversity'.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
