Message from the Guest Editors

Dear Colleagues,

This issue will be devoted to more recent aspects of adipocyte biology, including the impact of sleep and exercise that are now known to regulate adipose tissue function and contribute to systemic metabolic function. The title “new players” also refers to the authors of the manuscripts. We have largely selected Assistant Professors who are just establishing their own laboratories after training in nationally recognized adipocyte biology laboratories. Given the global epidemic of obesity, there is increasing interest in adipocyte biology. Hence, we think these manuscripts will be of great interest to investigators in the fields of obesity, type 2 diabetes, and metabolic diseases.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, AGRICOLA, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
