Deficiencies of Behavioral or Phenotypes Characteristics Based on Environments, Genetics, Disease and Another Factors

Guest Editor:

Dr. Tomoyoshi Komiyama

Department of Clinical
Pharmacology, Tokai University
School of Medicine, Isehara 259-
1193, Kanagawa, Japan

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

The scope of this Special Issue comprehensively encapsulates a wide range of fields, such as medical diagnosis, evolution, phylogeny, taxonomy, ecology, behavioral science, genetics, molecular biology, pharmacology, and anthropology. In addition, the Special Issue aims to incorporate cutting-edge technologies in life science, reflecting the trend to consistently develop the research approach in this field by drawing on diverse perspectives and an in-depth understanding of the research problem. This approach to research will be reflected in the subsequent results, which combine a series of studies on behavioral characteristics, character (phenotype) developments, gene function., etc.

The Special Issue will focus on developing a full understanding of research motivations and questions and will draw on the behavioral characteristics of living organisms and any different experimental data from biology to enhance the analysis of relationships based on many biological methods.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
