Deadline for manuscript
submissions:

closed (30 November 2022)

Message from the Guest Editor

Dear Colleagues and Fellow Researchers,

The impact of inflammation, infection, and cancer in breaking immune tolerance during defense, surveillance, and homeostasis remains unclear. It is therefore relevant to discuss beyond antigen affinity and lymphocyte selection. Plasticity can be affected by immunopotentiators and suppressants, sugar metabolism can be correlated with bacterial symbiosis, and membrane neuro-immune molecules can fail to discriminate between senescence and on-going infection. Alternatively, on-going inflammation can yield long-distance cues inducing macrophage differentiation, affect controlled cell death, and control lipid signaling during resolution.

This Special Issue aims to encourage the submission of original research and review manuscripts focused in experimental and clinical work in the field of immune tolerance. Aiming to widen the horizon of the field, this title will approach classic and modern methodologies and focus on the roles of cellular communication and molecular regulation as a bridge between clinical manifestation and the development of auto-immunity.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
