## Biosynthesis of Metabolites from Microorganisms, or Microorganism-Host Interaction? (Volume II)

Guest Editors:

### Dr. Fengli Zhang

State Key Laboratory of Microbial Metabolism, School of Life Sciences and Biotechnology, Shanghai Jiao Tong University, Shanghai 200240, China

### Prof. Dr. Zhiqiang Liu

School of Life and Health, Hainan University, Haikou 570228, China

### Prof. Dr. Michel Denis

Mediterranean Institute of Oceanography UM 110, Aix-Marseille University, Toulon University, CNRS, IRD, Marseille, France

Deadline for manuscript submissions:

**15 August 2024**

### Message from the Guest Editors

Dear Colleagues,

Microbial metabolites are compounds that microorganisms use to complete their own life activities. They include primary metabolites such as amino acids, lipids, and organic acids, and secondary metabolites such as antibiotics. Different microorganisms produce different metabolites, resulting in diverse structures of metabolites that are widely used in medicine and industry. The biosynthesis of metabolites also provides new ideas and breakthroughs for research in the life sciences.

For this Special Issue, research on the regulation mechanism of metabolite biosynthesis and analyses of the metabolite biosynthesis process are welcome for submission. Moreover, submissions of research on the biological activity of metabolites are also welcome.

Dr. Fengli Zhang  
Prof. Dr. Zhiqiang Liu  
Prof. Dr. Michel Denis

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
