Plant Functional Genomics in the Era of Omics Approaches

Guest Editors:

Dr. Mariateresa Volpicella

Department of Biosciences,
Biotechnology and Environment,
University of Bari "Aldo Moro", Via
Amendola 165/A, 70126 Bari, Italy

Dr. Cinzia Montemurro

Department of Soil, Plants and
Food Sciences, Faculty of
Agricultural Science, University of
Bari "Aldo Moro", 70126 Bari, Italy

Deadline for manuscript
submissions:
closed (31 August 2023)

Message from the Guest Editors

In recent years, omics approaches have offered an extraordinary opportunity to identify and measure a huge number of genes and proteins that play a crucial role in the regulation of several plant cellular processes. The availability of the entire genome from model plants, such as *Arabidopsis thaliana* and rice, lays the foundations for understanding and assigning functions to unknown genes, using different and multiparallel approaches. Indeed, comparative genome analysis is actually a powerful approach, which is useful in the identification of gene functions associated with plant metabolic processes and development. In this perspective, all the data derived from transcriptomics, proteomics and metabolomics studies allow the investigation of the intricate network of relationships between biomolecules within the plant system.

This Special Issue welcomes the submission of original research and review manuscripts focusing on plant functional genomic studies, including methods and developments that have made contributions to field development.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
