Message from the Guest Editors

Dear Colleagues,

This Special Edition will provide an in-depth scope of the Vav proteins. These proteins play cardinal regulator roles as signal transducers in various physiological systems. Due to their important functions, their dysfunction leads to the emergence of various diseases, such as cancer. This Special Edition will follow the discovery of this unique family of proteins, their functions, and their involvement in health and disease.

Prof. Dr. Shulamit Katzav

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
