Message from the Guest Editors

Dear Colleagues,

Recently, the diagnosis and treatment of liver diseases, such as viral hepatitis, liver cirrhosis, and liver cancer, has been subject to considerable progress. However, diagnostic and treatment methods are still inadequate, and liver diseases represent a major cause of death. Further progress in the diagnosis and treatment of liver diseases is needed in order to reduce the number of deaths from liver diseases. We believe that further research on liver diseases will lead to new insights on this fascinating topic. It has recently been reported that sarcopenia, gut–liver axis, and blood coagulation are related to the pathophysiology of liver diseases, which may also prove useful for the diagnosis and treatment of liver diseases.

This Special Issue, titled "Recent Advances in the Diagnosis and Treatment of Liver Disease", welcomes a wide range of papers on basic research, clinical research, and review articles. We look forward to receiving high-quality papers from pertinent researchers.

Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
