Message from the Guest Editors

Dear Colleagues,

The skin is the organ that is in contact with the environment. It acts as a barrier to prevent pathogens from penetrating into the body. Although the structure of skin is well defined, much remains to be known about skin biology and the interaction of its different structures. Due to its importance, the editors of *Biology* have set up an Issue dedicated to this field. For this Special Issue, we invite research and review articles on various aspects of skin biology. Topics of interest could include, but are not limited to:

- Skin structure
- Skin anatomy
- Skin morphology
- Skin physiology
- Skin pathology

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
