

Special Issue

Feature Papers in 'Conservation Biology and Biodiversity'

Message from the Guest Editor

The anthropogenic destruction of biodiversity has been ongoing for centuries or even millennia in many areas of the Old World, but it has never been more intense than it was in the past century. The development of increasingly energy-intensive human populations, the expansion of cultivated plants and domestic animals, the diffusion of alien and invasive species, and the impacts of technologies are accelerating transformative processes of natural ecosystems at an unprecedented and uncontrollable rate. Research on conservation biology is at the heights of its activity, boosted by unprecedented possibilities of collecting and modelling big data in the ecology of ecosystems and populations, population genomics, as well as microevolution and co-adaptation processes between components of the biosphere and the technosphere. Therefore, we invite anyone interested to contribute their papers to the realization of the special issue in 'Conservation Biology and Biodiversity'.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
