Special Issue

Advances in Leishmaniasis and Chagas Disease: Biology, Epidemiology, Treatment and Control (2nd Edition)

Message from the Guest Editors

This Special Issue is the second edition of "Advances in Leishmaniasis and Chagas Disease: Biology, Epidemiology, Treatment and Control". Leishmaniases are a group of diseases that affects around 700,000 to 1 million people worldwide annually. Chagas disease is caused by Trypanosoma cruzi, and it is estimated that there are about 6 to 7 million people infected with it worldwide. Clinical outcomes of both diseases depend on the complexity of the factors involved, related both to the parasite (genetic variability, inoculum, infectivity, pathogenicity, virulence, and inoculation pathways) and the host (age, sex, nutrition, immune profile, and species).

This Special Issue aims to report new insights into interdisciplinary approaches covering host-parasite and vector interaction, immune response of hosts, new molecular pathways for parasite survival and persistence, new drug development and mechanisms of antiparasitic drugs, as well as control, epidemiology, and vaccine development. We envision that this Special Issue will introduce valuable insights regarding leishmaniasis and Chagas disease management.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
