

## Special Issue

# From Conception to Birth: Embryonic Development and Disease

### Message from the Guest Editors

The intricate processes that occur during embryonic development are vital for the formation and functioning of organs, tissues, and systems in the human body. Any disruptions during this period can have lasting effects on an individual's health. Understanding these events is crucial not only for exploring the origins of life but also for gaining insights into various diseases and conditions that may emerge later in adulthood. This Special Issue delves into the timeline of fetal development, examining aspects of embryonic growth and its connection to health. Researchers are encouraged to submit articles exploring organogenesis, cell differentiation, genetic regulation, environmental influences, reproduction, sex determination, pregnancy, congenital anomalies, and the physiological basis of diseases. Studying this area may reveal links between early life events and disease onset, potentially informing new approaches to address health issues.

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
