The Role of Immune Responses in Liver Disease Progression

Message from the Guest Editor

Alpha-1 antitrypsin deficiency-associated liver disease is defined as a liver injury caused by hepatic ER stress and the hepatic accumulation of misfolded alpha-1 antitrypsin and lipid droplets. The main histological features are PAS+D-positive globules and fat accumulation, progression to liver fibrosis, cirrhosis, and HCC. These changes may be triggered and exacerbated by extrinsic factors, including chronic infections or systemic inflammation. In addition to adults, alpha-1 antitrypsin deficiency-associated liver injury also occurs in about 10% of infants born with the severe form of alpha-1 antitrypsin deficiency. For this Special Issue, we encourage the submission of manuscripts on any aspects of alpha-1 antitrypsin deficiency-associated liver disease, including epidemiology, pathogenesis, organ–organ interactions, progression to cirrhosis and end-stage liver disease, and/or treatment approaches. We welcome the submission of review articles and short- and full-size original research articles to this topical Special Issue.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
