

## Special Issue

# Airway Smooth Muscle and Respiratory Diseases

### Message from the Guest Editor

Asthma is characterized by airway hyperresponsiveness (AHR), inflammation and remodeling. Airway smooth muscle (ASM) cells have pivotal roles in all these aspects of asthma. The contractile function of ASM cells primarily contributes to the bronchospasm and reversible airway obstruction seen in asthma exacerbations. Furthermore, the synthetic and secretory functions of ASM cells are pivotal to airway inflammation and remodeling. In order to gain a deeper understanding of the role of ASM in all three aspects of asthma pathology—airway hyperreactivity, airway inflammation and remodeling—and to expedite identifying novel, druggable targets related to these aspects, we invite researchers to submit cutting-edge original and review articles on the topic of airway smooth muscle and respiratory diseases. This Special Issue aims to contribute to the much-needed novel knowledge on ASM biology relevant to airway diseases characterized by bronchospasm, such as asthma and COPD.

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
