Special Issue

2nd Edition: Conservation and Evolution of Wildlife in the Context of Climate Change and Human Population Growth

Message from the Guest Editor

This Special Issue aims to improve our knowledge on and deepen our understanding of the responses of wild animals and plants to environmental changes caused by human population growth and climate change (including local temperature change), documenting shifts in behaviour, physiology, ecology and distribution. In this way, we expect to provide basic data and theoretical bases for the development of species conservation policies. In addition, we also expect to understand how wild animals and plants adapt to the above ecological problems. This Special Issue will include reviews and research articles that focus on the "Conservation and Evolution of Wildlife in the Context of Climate Change and Human Population Growth". Please send an abstract prior submission to ensure that your work fits within this Special Issue's scope. We look forward to receiving your contributions.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
