

## Special Issue

# Epibiosis in Aquatic Environments

### Message from the Guest Editors

The interspecific interaction between basibionts and epibionts often provides favorable ecological conditions for the colonization of new habitats based on non-native species, driving the invasion process. Researchers have sought to investigate the biology of aquatic epibionts and distribution results that are essential in current applied zoology and conservation, updating the biodiversity knowledge base for habitat protection and restoration. We are pleased to invite submissions from authors from around the world that deal with different aquatic habitats to enhance the knowledge base on epibionts' biology and their interactions. Research areas may include (but are not limited to) the following:

Epibiont interactions;

Biological features of epibiont organisms;

Experimental trials involving epibionts;

Epibiont update checklists;

Geographical literature reviews;

Plastisphere interactions;

Anthropogenic impacts on epibiont interactions;

The recent occurrence of epibiont species;

The impact of on-native species on epibiont communities;

Relations between non-native basibionts and non-native epibionts. We look forward to receiving your valuable contributions.

---

### Guest Editors

Dr. Marco Albano

Department of Veterinary Sciences, University of Messina, 98168 Messina, Italy

Dr. Claudio D'Iglio

Department of Chemical, Biological, Pharmaceutical and Environmental Sciences, University of Messina, 98166 Messina, Italy

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
