

Special Issue

Feature Papers on Developmental and Reproductive Biology

Message from the Guest Editor

This Special Issue, 'Feature Review Papers on Developmental Biology', aims to collect high-quality review articles that explore the whole plethora of current research problems in the field of developmental biology. This field includes processes that regulate all aspects of gametogenesis and embryo, fetus and adult development in living organisms, both unicellular and multicellular. Numerous research questions remain unresolved and thus should be the focus of future research, such as, for example, the molecular and genetic mechanisms governing sperm and oocyte development, the commitment of cells to form embryonic and adult tissues, the role and the nature of stem cells, differentiation and dedifferentiation, interrelationships between cells in situ in tissues and organs as a result of both direct and distant communication, mechanisms of aging in cells and organisms, and, importantly, the impact of environmental cues on the developmental processes in plants, animals and humans. We sincerely welcome your submissions to this Special Issue on any of the subject areas discussed and any others that are closely related to all aspects of developmental biology.

Guest Editor

Prof. Dr. Jacek Z. Kubiak

Dynamics and Mechanics of Epithelia Group, Faculty of Medicine,
Institute of Genetics and Development of Rennes, University of Rennes,

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
