

Special Issue

Biodiversity Patterns

Message from the Guest Editor

Dear colleagues, Biodiversity pattern is a key issue to establish sustainable environmental planning and wildlife conservation. Successful environmental policy seeking biodiversity conservation should consider patterns of biodiversity and its specific characteristics. Patterns in diverse scale— α , β , and γ diversity—should be reflected in ecosystem management and planning. Particularly, information on species composition and its distribution can be used to establish optimum management strategy under diverse disturbances such as climate change, and human impact. Spatial analysis, field studies, statistical modeling, and other methodologies can be applied to evaluate biodiversity pattern. This Special Issue welcomes valuable findings and discussions regarding biodiversity patterns in diverse urban and natural environments.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
