

Special Issue

Cues Followed by Parasites and Predators in Detecting Their Victims

Message from the Guest Editors

This Special Issue will be comprised by the latest research focusing on identification of the cues and signals employed by parasites and predators to locate their hosts and prey. It will embrace experimental, correlational and review manuscripts on this topic in different systems. This Special Issue will also pay attention to the important but yet neglected role that microorganisms and nest materials may play in these interactions. In addition, it will include research aimed at understanding the biased preferences of parasites and predators over cues or signals derived from certain host and prey phenotypes, as well as at identifying the effects of this preference on host and prey populations.

Guest Editors

Dr. Gustavo Tomás

Department of Functional and Evolutionary Ecology, Estación Experimental de Zonas Áridas (EEZA), Consejo Superior de Investigaciones Científicas (CSIC), Carr. Sacramento, s/n, 04120 La Cañada de San Urbano, Almería, Spain

Dr. Juan José Soler

Departamento de Ecología Funcional y Evolutiva, Estación Experimental de Zonas Áridas, Consejo Superior de Investigaciones Científicas, 04120 Almería, Spain

Deadline for manuscript submissions

closed (30 November 2021)

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
