Role of Plant-Fungi Interactions in Nutrient Cycling and Ecosystem Functioning

Message from the Guest Editor

Plant–fungi interactions, a pivotal research area within ecology and environmental science, hold profound scientific significance and real-world importance. Over several decades, scientists have been delving into this domain, revealing the intricate relationships between plants and fungi, which profoundly influence ecosystems' structure and functioning. From mutualistic associations, such as mycorrhizal symbiosis, to the decomposition of organic matter contributing to nutrient cycling, this field provides profound insights into how ecosystems operate. The importance of this research lies in unlocking the mysteries of the natural world and its practical applications for the health of ecosystems, the preservation of biodiversity, sustainable agriculture, climate change mitigation, and ecological restoration.

Guest Editor

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
