Translational Aspects of Cardiovascular Biology: From Bench to Bedside

Message from the Guest Editor

Cardiovascular disease is one of the leading causes of death, and the search for novel mechanisms and therapeutics is desperately needed. Therefore, basic and translational studies in the cardiovascular field represent the best strategy to identify novel therapeutic targets and improve the quality of life of patients with cardiovascular disorders. On these grounds, this Special Issue of *Biology* has the main objective to gather papers that have a solid basic research setting and/or translational potential. Therefore, studies exploring novel molecular and cellular mechanisms underlying cardiovascular disorders as well as pre-clinical investigations testing novel hypotheses that can advance the field are especially welcome in this Special Issue. Novel pharmacological hypotheses and medicinal chemistry endeavors toward novel drug development are also encouraged. The studies must be well designed, with rigorous controls. Original investigations, review articles, and short communications are especially welcome.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
