

Special Issue

New Resources and Methods for Reconstructing Human- Pathogen Co-evolution

Message from the Guest Editors

This Special Issue will take a multidisciplinary approach geared towards utilising the currently available clinical and historical human infectious agent data to systematically explore the molecular histories of human infectious diseases. The aim of this Special Issue is to bring clinicians, evolutionary biologists, archaeologists and data scientists together to provide readers with an up-to-date and state-of-the-art summary of sampling resources, electronic data archiving and sharing and computational and statistical methods, to provide a comprehensive analysis of human pathogen exposure and the molecular histories of human infectious diseases. Research articles, review articles as well as short communications are invited. We ask you to send us an abstract prior to submission to ensure that your work fits within the scope of this Special Issue.

Guest Editors

Dr. Ville Pimenoff

Dr. Riaan F. Rifkin

Dr. Simon Underdown

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
