

## Special Issue

# Craniofacial Development and Evolution

### Message from the Guest Editor

The skull is a vertebrate novelty, the origin and diversification of which is associated with major evolutionary transitions, including the shift to a predatory lifestyle, the colonization of land, and the ability to masticate while breathing. The developmental, genetic, and epigenetic mechanisms contributing to or constraining craniofacial variation are not fully understood. Furthermore, the environmental and ecological context of development can impact both the form and function of the craniofacial structures, although much remains to be elucidated in this regard. This Special Issue will provide a broad overview of craniofacial development and evolution. We invite perspectives on the development, evolution, and/or morphological variation of any tissue or structure in the vertebrate head. Investigations of the mechanisms facilitating the evolvability and plasticity of the craniofacial structures are encouraged. Submissions may include both original research projects and reviews.

## About the Journal

### Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
